

Where vision finds form.

Brand Philosophy

Every project begins as a conversation. By listening closely and designing with care, I help clients shape their ideas into clear, authentic visual identities that leave a lasting impression.

Brand Mission

Mission Statement

I deliver high-quality, empathetic design solutions that bring clarity, purpose, and individuality to each client's vision—empowering them to take pride in their brand and see their ideas fully realized.

Tagline

Where vision finds form.

Core Values

Empathy

Design with the belief that every client's vision is personal and unique. Through active listening, I aim to understand each client's style, story, and goals — ensuring the designs I create are a true reflection of who they are.

Positivity

Approach every project with optimism, believing that creative challenges are opportunities for growth. By fostering a positive mindset, I help clients see new possibilities and deliver design solutions that exceed expectations.

Commitment to Growth

Holding my brand to a standard of continuous improvement, treating each project as a chance to surpass previous work. Guided by self-discipline and a relentless pursuit of quality, I strive to deliver results that reflect both technical excellence and creative passion.

Brand Personality

Resilient

Embrace challenges with determination and adaptability, approaching each project with a mindset of perseverance and creative problem-solving.

Understanding

Anticipate client needs with care and insight, often addressing challenges and providing solutions before they arise.

Adaptable

Remain flexible throughout the creative process, evolving designs and strategies based on feedback to ensure the final result fully aligns with the client's vision.

Warm

Bring a welcoming and supportive energy to every collaboration, creating a comfortable environment where clients feel heard, valued, and empowered.

Tone

My brand voice is professional, empathetic, and thoughtful. I communicate clearly and respectfully, focusing on building trust and understanding with clients.

My tone balances warmth with expertise — creating a supportive environment where ideas can take shape and flourish. Every message and design choice is guided by a commitment to clarity, quality, and meaningful collaboration.

The goal is to make clients feel heard, valued, and confident in the creative process, ensuring that their vision is translated into purposeful and impactful design.

Moodboard

A vibrant and dynamic visual exploration featuring retro-futuristic aesthetics, neon-infused palettes, and bold graphic elements. This moodboard embodies creativity, digital nostalgia, and a playful yet structured approach to design.

Logo Exploration

Final Design

Drafts

First Iteration

This logo was my first personal brand mark, developed using the same moodboard that continues to guide my design direction. I was drawn to the triangle for its balance and clarity, and modified it by removing the top-left corner to create a simple, scalable icon.

Second Iteration

Building on the original design, I reworked the triangle into a right-angled form and placed it within a circle to create a more structured, balanced mark. The geometric contrast added visual strength while improving legibility across various sizes. This version reinforced the identity's bold, modern character and helped solidify the direction for my final logo.

Logo Space Guidelines

To ensure the Avery Ember Day logo maintains its visual integrity and legibility, a minimum amount of clear space must be maintained around the logo in all applications. This area acts as a protective buffer, free from text, graphics, or other visual elements.

Each variation of the logo (full, icon, and monogram) has its own clear space specifications. The distance between the triangle's highest point and the circle defines the measurement unit.

Logo Version	Context	Minimum Size	Background	Top Margin	Bottom Margin	Side Margins
Primary Logo (Large)	Websites, posters, portfolios	1.5 inches (108px)	High Contrast, Color Logo with Black preferred, white allowed	2 units	1 unit	0.5 units
Secondary Logo (Medium)	Business cards, emails, mobile headers	1.14 inches (82px)	High contrast, Color Logo with Black preferred, white allowed	3 units	1 unit	N/A
Icon (Small)	Favicons, app icons, social media	0.66 inches (48px) **0.33 inches (24px) in B&W**	High Contrast, Color Logo with Black preferred, B&W logo preferred below 48px, white allowed	2 units	1 unit	N/A

Size Variations

Primary Logo (Large)

Use this version when there is sufficient space and screen resolution for the script font to remain legible. It is ideal for website headers, presentations, print materials, and other full-size applications. The minimum size is 1.5 inches (108px).

Secondary Logo (Medium)

Use this simplified version when the logo appears at smaller sizes, such as on business cards, email signatures, or mobile headers. This ensures the logo remains clear and recognizable. The minimum size is 1.14 inches (82px).

Icon (Small)

Use this version for very small spaces where full typography would not be legible, such as social media profile images, favicons, or app icons. The minimum size is 0.33 inches (24px) for black and white and .66 inches (48px) for color.

Smallest Acceptable Sizes Visual Guide

Color Variations

Color Logo

The full-color logo should be used in digital and print formats where brand personality and vibrancy are desired—such as web headers, social media, or marketing collateral. It should be placed on neutral or light-colored backgrounds that offer sufficient contrast to preserve legibility.

White Logo

The white logo variation is ideal for use on dark backgrounds, including black, deep gray, or any high-contrast dark color that allows the white mark to stand out. This is the preferred option when a dark or black background can be used digitally or in print.

Black Logo

Use the black version of the logo only when a black background is not possible—typically due to printing constraints or production limitations. It must always be placed on a light, high-contrast background (such as white or light gray) to maintain readability and visual impact.

Logo Usage

Do:

- Use only the approved logo variations provided in this guide
- Maintain the required clear space around the logo
- Ensure the logo appears on high-contrast backgrounds for visibility
- Scale the logo proportionally—always maintain the original aspect ratio
- Use the white logo on dark backgrounds and the black logo only when black cannot be printed

Do Not:

- Do not stretch, squash, or distort the logo in any way
- Do not change the logo's colors or apply unauthorized gradients or effects
- Do not rotate or reposition logo elements
- Do not place the logo on low-contrast or visually cluttered backgrounds
- Do not add shadows, outlines, or filters
- Do not crop any part of the logo or remove elements like the circle or triangle
- Do not recreate or redraw the logo manually

Color

Color Palette

Neutral: White	#FFFFFF	255,255,255	0,0,0,0	

Typography

The Avery Ember Day brand uses a structured typographic system to create visual hierarchy and consistency across all platforms. Each typeface plays a distinct role within the identity.

Dreamboat Bold

Used exclusively in the brand icon, Dreamboat Bold adds a playful, distinctive touch to the logo mark. It should be reserved for this use only and not applied to any other text or headings.

Transducer Bold

This typeface appears in two key areas of the brand icon: as “AED” in the medium version and as “DAY” in the large version. Transducer Bold is also approved for H1 headings. All caps are acceptable when using Transducer Bold, especially for short headings or labels. Its use should be limited to large, attention-grabbing headers to avoid visual clutter.

Barlow

Barlow Bold is ideal for subheadings or small titles, while Barlow Regular is used for body text and general content. In documents or layouts where simplicity or accessibility is key, Barlow may also substitute for Transducer in headings.

Barlow is the primary typeface for general use across all brand applications. It is ideal for websites, documents, presentations, and other text-heavy formats. Barlow is the only font permitted to be italicized in the brand system.

It may be used in the following weights, at the designer’s discretion, to create clear typographic hierarchy and emphasis:

- Extra Bold
- Black
- Bold
- Semibold
- Regular

Typeface Reference

This guide displays all approved fonts and weights used across the Avery Ember Day brand. Dreamboat Bold is reserved for logo use only. Transducer Bold is used for large headings and select icon text. Barlow is the primary typeface for body text and headings, with approved use of weights from Regular to Black, including italic variations where appropriate. Designers may choose the weight and style based on context and clarity.

Brand Applications

Business Cards

Clean and minimal layout featuring the medium logo and a scannable QR code. Designed for high legibility with clear hierarchy and brand colors used sparingly to maintain focus.

Stationery

A consistent and professional layout used across letters, invoices, and branded documents. The header integrates the primary logo with generous white space for clarity and balance.

Backdrops

Event or presentation backdrop featuring a repeated logo pattern. Tiled in a scalable layout that maintains brand presence without overpowering the scene.

Social Media Banner

Designed for use across platforms like LinkedIn or Facebook, this banner integrates bold color and typography to make a strong first impression while reinforcing brand voice.

Favicon/ App Icons

Icon version of the logo optimized for very small-scale use. Maintains recognizability even at 24px (monochrome) through simplified geometry and strong contrast.

Social Media Mockup

A visual mockup demonstrating how the logo appears in a branded social media post. The icon takes center stage, paired with the brand name as a tag to reinforce identity and ensure recognition across digital platforms.

Email signature

A sleek and accessible email footer with logo, and contact links. Designed for compatibility across devices and email clients.
